

# Crellin Park Winter Botany: Map of Flagged Trees.

Pink-flagged trees are for the first installment; yellow-flagged trees are for the second installment.

# Woody Plants in Winter: A Self-guided Course at Crellin Park in Chatham, NY.

## First and Second Installment of Trees

This free course is composed of several ingredients:

- A set of flagged study trees (hot pink for the first installment; yellow for the second) at Crellin Park; the location of all trees is shown on the accompanying map. All flags are numbered. For the Study Trees, marked “Tree” on the map, the identifications are provided below. For the Quiz Trees, marked “Quiz” on the map, answers are provided on-line (<https://hvfarmscape.org/WinterWoodies>) and are meant to be consulted after you’ve tried to ID the trees yourself.
- If you want to do all of the flagged trees as a self-quiz, then just use the map on the front and read no further until you’ve made your guesses. All quiz trees are species you will have already met, but be careful – the second batch of quiz trees also includes some trees from the first installment!
- [The course website](#) includes a downloadable set of Winter Tree ID cards (this course’s ‘text book’!) and links to some additional resources. Hard copies of those ID cards can be obtained by emailing Conrad at the address below.
- A video introductions to our “[First Friends](#)” and to our “[Second Friends](#)” are provided on-line. These were filmed at Crellin Park and are meant as your tour guide; they will provide you with some identification tips.

Crellin Park is open dawn to dusk every day so take the course whenever you want! This is a collaboration between the Hawthorne Valley Farmscape Ecology Program and the Town of Chatham.

Questions, comments or requests for printed versions of the winter bud cards can be directed to Conrad Vispo ([conrad@hawthornevalleyfarm.org](mailto:conrad@hawthornevalleyfarm.org)) or 518 938 1109.

WE HOPE YOU HAVE FUN!
